meeting this morning in strategic planning team - for guidance on plans going fwd.

same page 3 phase approach

#1) Stabilization (not for ops/harden core)

#2) actions on ^{low hanging fruit} Bank / ^{Bank /} ^{not earlier than Friday} ^{start and not stopping til done}

#3) maintenance - presence / footprint

so that nothing recurs after that.

will be faced in different situation so the maintenance plan will only start once the intense actions on plan has been finished.

Facing destabilization of OPS Command - put this situation in a very different one now.

→ municipal - provincial Emerg Acts.

Full confidence in this team and resources we have that this plan will work.

1218 Hodgins etc enforcement is partners (from Unvst side)

have integrated plan where does it fit in your plan

↳ need to know how what we

do will impact Actions on

ELN plan will drive the Unvst plan

time	from	to	Notes
1219	Hodgins	E/C	partners are on the phone - my recommendation is picking on the periphery. this escalation may result in shrinking foot prints - the (H)
1220	E/C		their plan (Wnu) aligns w actions on plan an war action plan for fuel direction moving fwd; education / discouragement / officer discretion. any changes to that will come for this table.
1221	Plamora	E/C	for stabilization phase how do you see POC assisting and still being align to go actions on not for Friday. (small element)
1222	E/C	Plamora	resources will be rolled as once we start we are not stopping go back and forth alternating OPS / OPD to take way off and get partners to come in w that - this way ready to go actions or when ready to go POC being used in other areas and can't be the case now working on a plan
1224	Plamora		
1224	Br. M. M.		

time	from	to	notes
1225	E/C	Flanagan	expectation of stabilization is to push police officer do police work so you do theirs or have a rest day.
1227	E/C		PLT will be on steroids → planning can working on a message will put out - concentrating on emergency measures. Off PLT staying @ city hall waiting for direction.
1227	Ek		Due to misunderstanding w letter of moire (24-72 hrs) stood down resources to make sure safe movement to respect that agreement btwn both sides - that is what happens w' political negotiate w' police not @ table.
1227	Walker		
1228	Lucas		3-4 trucks left - collecting all info they can get - send to Command Off - trucker leaving stating the ^{they} are staying die hards
	E/C	Lucas	stay connected w me. and advise what you need.
	E/C	Lucas	Hard stop on messaging
1231	Seamus	Andrew	yesterday moving 2 @ a time w traffic Sgt.

time	from	to	Notes
1230	Walker		if you are changing direction w/ no built in resources Since we already moved some don't we have to respect that today?
	Walker		response: we don't have the resources today that we had ^{ed} yesterday.
	Plange		nervous to say that - optics would be that we are not prepared.
	E/C		people put stuff into play that we have no control over. What resources on the Road w/ Pol assistances as issues come up we will deal with it
1235	Walker		today we have moved stuff... if they ask but that's it didn't change any messaging
1236	Walker		moving fwd w/ way things are going - we had to pause step back - consider direction going fwd - if want to leave we have to facilitate that
1247	(S)

1237	E/C		report to Command anyone who wants to move up	We are NOT following the instructions of the JTF
1238	Drummond		Do we even the still have room left on Wellington (Elgin/Bay)	10
1238	Lucas		I think there is but will check cameras and assess.	
1239	Hodgins		are we complicating the problem on Wellington: no more room on Wellington go home.	
1240	Walker		"no room stay here - not helping us" underlying issue is that police not bound by that agreement ^{but} agreement ^{not} and doesn't override the law.	
1240	Hodgins		chief cannot override the law.	
1241	Gradio		obligations ^(?) obligations / legal ^{to not do anything to support.} files action on looking @ 12-24 hrs window is 24 hr freeze we will be good.

1246	E/C		What is the risk to re-engage a direction command is getting from D/C Bell
1247	Walker		Advice / opinion = No, not if going into different direction. Overall message is that they have to leave.
1249	Walker		pushed on radio more than once that * enforcement but officer discretion.
1250	E/C Springer		interpretation of letter 24-72 Hrs. → PLT retreated until further direction → Bell wants this to continue but don't have resources and PLT don't want to message out because of emorg act m. pro Feb
1252	Springer		" " " have to necessitate your leaving from area - this

1255	Hodgins		
1256	E/C		Need to take hard stance on what we are going to do. Emergency Act really changes things for us.

1447	E/C	D/C Ferguson	confident about this but Corp coms showed me Media piece that OPP/RCMP taking control of this just want you to know you can have confidence in net ^{net} We are getting alot of work done: moved up no earlier than Friday w encouragement from Carson to go actions on means lining up resources for <u>when</u> this will happen after Friday from Carson because of Emergency act could possibly mean city lock down. Could go to Unified Command. But this was before the message from the Minister of public Safety. Wording looks like they are completely taking over - but as per Media (Amy) they mis quoted and are retracting message.

time	from	to	Notes
	E/C	^{Dr} Ferguson	Just wanted you to know if you are good w/ decision that I am confident in this. Would like to see Hue/Bernier/Springer as unified Command + maintenance team 12 on 12 off - could potentially do that. 1529	Springer	E/C	We can coordinate POV operation from up here in Leiken - go in w sections @ Lecholas/Walter for example go in get people out - tow vehs and move to next area (ei Biden / Sussex) Just have to make sure we don't get ahead of logistics (don't run out of gas) 3 sections / 3 in reserve

1728	E/C	Manager	once you propose and I approve what you have decided will be how we will go about (re: the ground-Area operation)
1730	Manager	room	province only has 11 sections of POU -
3:47 	E/C	Manager	Need from us to proceed w fact no we have a good handle on it  

time	from	to	Notes
1732	Edwards		concept of operations - Plt ask that could drive some points wanted to know social rhythms (Bridan - Sussex) could keep figuring out regions #'s in each areas - have we identified where people that want to leave are?
1733	E/C	Edward	Plt stand point will go to intell and invest. to get that information will have to have CID embedded in your plan - cadence - need size and resources to keep up with you. to be prepared to manage arrests. Once areas id'd intell knows will work up an area/ risks established. (limited except "key people"). that action will be transferred to Brycen / Hopkins. you will be another aspect it will get too. Whole intent here slow and methodical.

time	from	to		Note
	E/C	Josiah	will start connecting w POU to see how best how this will work out and determine cadence	
	Spencer		have to make sure resources are there and ready to go - once we have action we will continue - might not beat a fast pace but it should not have alot of difficulty on this
